

# Healthcare

*Wherever you are*

# Bringing healthcare to your doorstep

**Compassion. Convenience. Comprehensive**

At Atlas Associates Clinic, we believe that quality healthcare should be accessible, personal, and stress-free. Whether you're managing a sudden illness, chronic condition, or simply prefer the comfort of your own home, our House Call Doctor service brings experienced medical care right to your doorstep.

We understand that not every medical concern requires a trip to the clinic — especially when you're unwell, have mobility challenges, or are caring for young children or elderly loved ones. Our trusted medical team delivers prompt, attentive care at home, ensuring your health is never compromised by inconvenience.

From diagnosing acute conditions to managing chronic illnesses and providing minor procedures, we are equipped to treat you with the same professionalism and attention you'd expect in a clinic — but with the added comfort, privacy, and ease of your own surroundings.

# WHAT WE DO

## Doctor-home Consultation

Personalised medical care in the comfort of your home, ideal for patients who prefer privacy, convenience, or are unable to travel.

## Home Procedures

From wound care to catheter changes, we bring essential procedures to your home so recovery stays comfortable and stress-free.

## Homecare Nursing

Skilled nursing care delivered at home — from post-surgical support to chronic disease management, all under the guidance of experienced clinicians.

## **Doctor-home Consultation**

Our team is available 24 hours a day, 7 days a week for medical house calls — providing everything from urgent care to routine medical consultations, directly in the comfort of your home.

We also provide hotel calls, allowing visitors to recover in the comfort of their accommodation. Our services are recognised by many travel insurance providers, offering peace of mind wherever you are.

Patients with complex or long-term needs, including those with geriatric or orthopaedic conditions, benefit from our ongoing care at home — especially following hospital discharge.

## What does it entails?

- General Medicine Consultations
- Chronic Disease Management (e.g.: Diabetes)
- Post-Hospitalisation Follow-up
